

Subject: Welcome to Bringing Summer Back!

Dear Medical Partner,

Thank you for registering as a partner in North Carolina Department of Health and Human Services' Bringing Summer Back initiative – a fun, flexible, community-centered approach to help every organization and individual stop the spread of COVID-19 by urging friends and neighbors to get vaccinated!

Thanks to the tireless work of physicians and medical professionals like yourself, half of all North Carolina adults have been vaccinated against COVID-19 with at least one dose. We appreciate all you do to continue growing this number and to bring us closer to the end of this pandemic.

We want to ensure that you have all of the materials you'll need to get started! You will find your toolkit [here](#), which you can use to promote vaccination within your practice and community. You can also have your patients learn more about Bringing Summer Back by visiting covid19.ncdhhs.gov/BringSummerBack or emailing socialmedia@dhhs.nc.gov.

Medical professionals are one of the top trusted sources for information about COVID-19 vaccines. Through your participation, you are making a difference by providing information that will encourage North Carolinians to get vaccinated so they can get back safely to the people, places and activities they love.

Thank you for your participation!
