Protect yourself and others

by getting a **safe, effective and free COVID-19** vaccine.
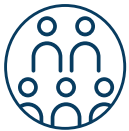

Did you know?

Living so closely with others puts you at higher risk for COVID-19 virus.

The vaccines keep you from getting very sick or dying due to COVID-19.

The COVID-19 vaccines are safe and they work. Millions of people have already taken a COVID-19 vaccine.

It is normal to feel sore, tired and achy or have a low fever or headache for a few days after getting vaccinated.

The sooner everyone gets vaccinated, the sooner we can return to normal operations and visitation.

**Ask for your safe and effective COVID-19 vaccine.
Protect yourself and your community.**
