COVID-19 Vaccine Management System (CVMS) - Provider Portal

Accounting for Extra Doses in the Vaccine Inventory - Job Aid

Please follow the instructions below if you need to account for any ‘Extra Doses’ administered from a specific Vaccine Inventory.

Extra Doses are any additional doses that are administered beyond what the CDC considers as expected for the specific COVID-19 manufacturer’s vial.

For example:
- If you receive 20 vials of Moderna COVID-19 vaccine, you enter 200 doses (20 vials x 10 doses per vial per manufacturer = 200 total doses) in the ‘Total Doses’ field in CVMS.
- If you are able to ultimately administer 1 extra dose for each of the 20 vials, you then will have 20 extra doses (1 extra dose x 20 vials = 20 extra doses) and can enter that in the ‘Extra Doses’ field.

Only users with a HEALTHCARE LOCATION MANAGER profile can account for Extra Doses. Extra Doses can be recorded for any COVID-19 vaccine type in CVMS. However, the CDC has issued guidance that providers should not extract extra doses from the Pfizer 6-dose vials.

Note: CVMS will not prevent a provider from entering extra doses for Pfizer 6-dose vials but will provide a visual warning to alert the provider when extra Pfizer doses are entered.

There are two ways to account for Extra Doses administered from a specific Vaccine Inventory. Use the option that aligns to your specific scenario:

**Scenario 1** – Add Extra Doses at Delivery

Vaccine shipment arrives, and you are ready to receive and record new inventory levels; you know there will be additional extra doses per vial in this vaccine inventory lot.

**Scenario 2** – Add Extra Doses during the Vaccine Administration Process

Your location has been administering vaccines from an existing vaccine inventory lot and now the Available Doses field states there are zero available doses. However, you are aware that there are remaining vials / doses available from this inventory lot.
Scenario 1 – Add Extra Doses at Delivery

Vaccine shipment arrives, and you are ready to receive and record new inventory levels; you know there will be extra doses per vial in this vaccine inventory lot.

In this scenario, you would account for the extra doses by updating the Extra Doses field for the new vaccine inventory at the time you receive the Vaccine Inventory.

2. Connect using your NCID username and password
3. Navigate to the VACCINE INVENTORY tab

4. Click ADD to add a new vaccine inventory
5. Complete all necessary fields including the **EXTRA DOSES** field to account for any anticipated additional doses per vial and then click **SAVE**
6. Review the **VACCINE INVENTORY**

#### Vaccine Inventory Details

- **Vaccine Product:** Moderna [10 MDV]: COVID-19 Vaccine
- **Lot:** 23456
- **Expiration Date:** 12/31/2021, 12:00 PM
- **Total Vials:** 100
- **Pfizer & Dose Vial Extra Doses Warning:**
- **Vaccine Inventory Name:** 23456 - 1 Delivery 09/17/2021
- **Account:** Solutions Loc2
- **Date Received:** 9/17/2021, 11:11 AM
- **Status:** Available
- **State Sponsored Contract:**

#### Dose Amounts

- **Total Doses:** 1,000
- **Extra Doses:** 100
- **Doses Available:** 1,100
- **Doses Administered:** 0
- **Doses Wasted:** 0
- **Doses Insufficient Quantity:** 0
Scenario 2 – Add Extra Doses during the Vaccine Administration Process

Your location has been administering vaccines from an existing vaccine inventory lot and now the Available Doses field states there are zero available doses. However, you are aware that there are remaining vials/doses available from this inventory lot.

In this scenario, you would account for the extra doses by updating the Extra Doses field for the existing vaccine inventory.

2. Connect using your NCID username and password
3. Navigate to the VACCINE INVENTORY tab

4. Search for the Vaccine Inventory you wish to update and click on the Vaccine Inventory Name

**Tip 1:** You might have to change the default view. At first connection, the filter selected is ‘Recently Viewed’. Switch to ‘All Vaccine Inventories’ and click on the pin icon to default to that filter in the future.
Tip 2: If you do not see the inventory you are looking for, type the lot number in the Search field.

5. In the Vaccine Inventory record DETAILS tab, and click on the pen icon located next to the EXTRA DOSES.
6. Enter the number of additional doses. 
   **Note:** Do not add doses to the Total Doses field when adding Extra Doses
