Interim Guidance for Private Social Gatherings
(May 12, 2021)

Guidelines for Private Social Gatherings: Any scenario in which people gather together poses a risk for COVID-19 transmission. This includes private social gatherings in North Carolina such as cookouts or holiday gatherings.

The Basics

- Keep the gathering outdoors.
- Wear a mask at all times indoors. (See below for when you can be with others without wearing a mask.)
- Get your COVID-19 vaccine. Find your spot to take your shot and vaccine providers at NCDHHS’s Find Your Spot Website
- Do not host or attend a gathering if:
  - You have been diagnosed with COVID-19
  - You are waiting for COVID-19 test results when having symptoms
  - You are experiencing symptoms of COVID-19
  - You have been told by the local health department to quarantine or isolate, or
  - You may have been exposed to someone with COVID-19
- No gathering should exceed current Mass Gatherings limits. Gatherings above these limits are currently prohibited statewide to slow the spread of COVID-19. However, the virus can be spread in smaller gatherings as well.
  - When deciding how many people to invite to your gathering, consider the amount of space you have and the ability to maintain social distancing during the event.
- People at high risk of complications for COVID-19 (e.g., people over 65 years of age or with underlying chronic conditions) should avoid social gatherings and stay home, if they are not fully vaccinated. If they do attend, ensure the 3Ws are practiced.
- Consider hosting virtual events, having a virtual option for individuals that are higher risk to join safely from their home.
- Practice the 3Ws (Wear, Wait, Wash) during the event: Wear a face covering, Wait six feet apart from others, and Wash your hands regularly.

Individuals Who are Fully Vaccinated

Two weeks after receiving your final COVID-19 vaccination dose:
NC DEPARTMENT OF HEALTH AND HUMAN SERVICES

- Individuals can gather indoors in private settings with other fully vaccinated people without wearing a mask.
- Individuals can gather indoors in private settings with unvaccinated people from one other household (for example, visiting with relatives who all live together) without masks, unless any of those people or anyone they live with is at increased risk for severe COVID-19 illness.
- Individuals must still wear a mask when in all indoor public settings, such as retail or restaurants (except when eating or drinking).

For more information, please review NCDHHS Interim Guidance for Individuals Who Have Been Vaccinated Against COVID-19.

Hosting a Social Gathering

Remind guests to stay home if they are sick
- Remind invited guests to stay home if they have been exposed to COVID-19 in the last 14 days or are showing COVID-19 symptoms.
- Consider keeping a list of guests who attended for potential future contract tracing needs.
- Encourage guests to download the SlowCOVIDNC Exposure Notification App.
- Tell your guests what steps you are taking to make sure your gathering is as safe as possible.

Encourage social distancing
- Host your gathering outdoors. Outdoor activities are preferred over indoor because it is easier to stay apart and the risk of contracting COVID-19 is lower because there is more wind and air to help reduce the spread of the virus. However, even in outdoor settings, the more people that interact in close contact increases the risk of COVID-19 transmission.
  - If this is not feasible, make sure the room or space is well-ventilated by opening windows and doors to the extent that is safe and feasible based on the weather.
- Arrange tables and chairs to allow for social distancing. People from the same household can be in groups together and do not need to be 6 feet apart – just 6 feet away from other groups or families.
- If planning activities for adults and/or kids, consider those where social distancing can be maintained, like sidewalk chalk art, corn hole, or frisbee.
- When guests arrive, minimize gestures that promote close contact. For example, rather than shaking hands or giving hugs, wave and verbally greet guests.
- Be mindful of serving alcohol, as guests are less likely to follow social distancing practices when drinking.
- Limit the number of people in the kitchen or serving area to encourage social distancing, and set up serving lines or food areas where individuals can maintain social distancing during the process.
  - If space allows, determine circulation pattern so that people can keep distancing and do not cross each others pass constantly.

Wear cloth face coverings
- Face coverings are required indoors in public settings when you are with individuals who you do not live with unless everyone is fully vaccinated, including visiting someone else’s house or when you are having guests over at your own home.
  - Face coverings are also recommended in outdoor settings when people who have not
been fully vaccinated are present, if individuals are unable to maintain six feet of social distance with non-household members. Face coverings are also strongly recommended for everyone (vaccinated and unvaccinated) in outdoor settings that are crowded and dense.

- Consider providing cloth face coverings for guests or asking them to bring their own.
- Keep hands and surfaces clean. Consider providing hand sanitizer in addition to clearly marked hand washing areas.
- **Wash your hands** for at least 20 seconds when entering and exiting social gatherings. If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol.
- Make sure there is adequate soap or hand sanitizer containing at least 60% alcohol, paper towels, and tissues available in the restrooms and encourage guests not to form a line at the door. Consider also providing cleaning supplies that allow guests to wipe down surfaces before they leave. Remove shared/communal hand towels.
- Remind guests to wash their hands before serving or eating food.
- Use single-use hand towels or paper towels for drying hands so guests do not share a towel.
- Clean commonly touched surfaces (e.g., door handles, sink handles, bathroom surfaces) before guests arrive.

### Attending a Social Gathering

#### Prepare before you go
- Get your COVID-19 vaccine. Find your spot to take your shot and vaccine providers at NCDHHS’s [Find Your Spot Website](#).
- Stay home if you have been diagnosed with COVID-19, if you are waiting for COVID-19 test results because of symptoms, are experiencing symptoms of COVID-19, been told by the local health department to quarantine or isolate, or think you may have been exposed to someone with COVID-19.
  - Invited guests who live with those at higher risk should also consider the potential risk to their loved ones or others who live in their household.
- Check with the host for updated information about any COVID-19 safety guidelines and if they have steps in place to prevent the spread of the virus.
- Prioritize attending outdoor activities over indoor activities and stay within your local area as much as possible.
• Bring supplies to help you and others stay healthy—for example, cloth face coverings (bring extra), hand sanitizer with at least 60% alcohol, and individual bottles of drinking water.

Use social distancing and limit physical contact
• Maintain a distance of at least 6 feet or more from people who do not live in your household. Be particularly mindful in areas where it may be harder to keep this distance, such as parking areas and routes of entry and exit.
• Select seating or determine where to stand based on the ability to keep 6 feet of space from people who do not live in your household, including if you will be eating or drinking.
• Arrive to the gatherings early or at off-peak times to avoid crowding and congested areas.
• Avoid forming a line at the restroom door or using the restroom at high traffic times, such as at the end of the gathering.

Wear cloth face coverings
• Wear a cloth face covering when interacting with other people to minimize the risk of transmitting the virus.
  o Remember that face coverings are required indoors when you are with individuals who are not vaccinated and with whom you do not live with, including visiting someone else’s house or when you are having guests over at your own home. Face coverings are also strongly recommended to be worn outside if you cannot consistently maintain 6 feet of distance apart from non-household members.
• Cloth face coverings (with two or more layers) are strongly encouraged in settings where individuals might raise their voices, such as shouting, chanting, or singing. These are activities that increase the release of respiratory droplets and fine aerosols into the air and pose higher risk of COVID-19 transmission.
• If guests need to remove a face covering to eat or drink, it is recommended they maintain 6 feet of distance from people outside their household and put their face coverings back on after they are done eating or drinking.

Limit contact with commonly touched surfaces or shared items
• Use paper towels instead of a communal/shared hand towel. Use touchless garbage cans or pails.
• Wash your hands with soap and water for at least 20 seconds or use hand sanitizer immediately before eating food or after touching any common surfaces like door handles and toilets

Considerations for higher risk individuals who are not fully vaccinated
• People at high risk of complications for COVID-19 should avoid social gatherings if not vaccinated.
  o High risk individuals include people over the age of 65 or have certain medical conditions.
• Higher risk guests should consider attending events virtually, so they can remain safely at home.
• If higher risk individuals do attend gatherings in person, ensure the 3Ws are practiced by all guests and limit the number of other guests in attendance as much as possible.
After the Event

- Get tested if you have been exposed to someone with COVID-19, unless you are fully vaccinated and without symptoms.
- Get tested if you have symptoms of COVID-19.
- Answer the call and participate in contact tracing to protect against further spread if you receive a call from the COVID-19 Community Team.

Staying apart brings us together.
Protect your family and neighbors.
