SlowCOVIDNC

DOWNLOAD THE SLOWCOVID19NC APP – AN ANONYMOUS WAY TO HELP SLOW THE SPREAD OF COVID-19.

NO personal or location information is collected or shared.

Here's how it works:

1. Download the free SlowCOVIDNC Exposure Notification app from the Apple App Store or Google Play Store to keep your campus safe.

2. After enabling Bluetooth and Exposure Notifications and opting in to receive notifications, the app will generate anonymous tokens for your device, which protects your identity.

3. Using Bluetooth, your phone will detect other phones close by that have also opted in to SlowCOVIDNC.

4. Any phones that exchanged tokens with an individual who tested positive for COVID-19 within the last 14 days, will receive a notification that they may have been exposed to the virus. No one's identity is known or shared.

Help slow the spread of COVID-19 on campus. Download the SlowCOVIDNC app.
